

PAC-N118S

- process meter in wall-mounted case
- input 0/4...20 mA, 0/1...5V, 0/2...10V
- 0 or 2 relay outputs
- power supply output: 24V DC
- RS-485 / Modbus RTU

The PAC-N118S process meter features easy operation, functional programming menu and a clear 4-decade, 20-millimetre LED display. Tight case with high protection class (IP 65) makes it an ideal choice for heavy-duty applications. The current input has a protection safeguarding the measuring resistor against damage. The device operates in the following modes: linear, root, square and user defined (max. 20 points). The relay (or OC) outputs can be controlled according to one or two threshold values. The settings can be changed without opening the tight case, by an infrared remote control.

- programmable measuring input type, range of displayed values, password and decimal point,
- programmable hystereses and delays of control outputs,
- programmable indication filtration,
- programmable processing characteristics,
- overload-protected current input,
- signal peak value detection.

Typical applications

1. Air humidity adjustment in the mushroom-growing plant.
2. Local indications in the measuring location.
3. Installation in difficult environment: high humidity, dust, etc.
